About
Me

I have been practising UX over a decade. I was playing multiple roles in the UX arenas. My passion is to transform customer's vision into design that solve their unmet needs. I am open to any roles that allow me to provide my innovative ideas for enhancing the product design.

"Putting user into the design process is very difficult for UX. One of the best way is Design thinking."

I have over 11+ years of experience in the IT industry where I played a variety of roles that started as a creative designer which has lead to Innovation and Global Strategy while designing product in multiple organisations.

My expertise lies in designing multiple products, across the globe and in multiple domains – Operating Systems, Enterprise Applications, Financial Portals, Business and financial management solutions, Retail etc., across multiple platforms – Online, Desktop applications and now mobile applications.
